	<p>industries work during seasonal period of 9 months (from 1st September to 31st May next year). However, this working period shall be taken as minimum of 4½ months for the purpose of billing/levy of MMC on month to month basis. Industries which work for more than 9 months and upto 12 months billing shall be done/monthly minimum charges levied on full sanctioned load as mentioned below for the seasonal period of 9 months and for the remaining 3 months (i.e. 1st June to 31st August) billing shall be done as per tariff applicable to general industrial consumers tariff rate/rate of monthly minimum charges shall be as given in schedule of tariff for large supply/medium supply/small power and as applicable depending upon the sanctioned load.</p>	<p>industries work during seasonal period of 9 months (from 1st September to 31st May next year). However, this working period shall be taken as minimum of 4½ months for the purpose of billing/levy of MMC on month to month basis. Industries which work for more than 9 months and upto 12 months billing shall be done/monthly minimum charges levied on full sanctioned load as mentioned below for the seasonal period of 9 months and for the remaining 3 months (i.e. 1st June to 31st August) billing shall be done as per tariff applicable to general industrial consumers. Tariff rate/rate of monthly minimum charges shall be as given in schedule of tariff for large supply/medium supply/small power and as applicable depending upon the sanctioned load.</p> <p>However, billing of rice shellers shall be done as under: -</p> <p>Billing for the rice sheller seasonal industry shall be done monthly. The Seasonal Minimum Energy Charges (SMEC) will principally be based on energy consumption formula $(4800+nx)9$ wherein monthly energy consumption of 50 kW rice sheller will be taken as 4800 units in accordance with LDHF formula (L-load: 50 KW, D-</p>

1

		<p>days: 24 days, H-hours: 10, F-demand factor: 0.4); where „n” represents numerical number rounded off to two decimal point and will be positive/negative 0,1,2,3,4,5.....upto „n” for each 10 kW increase/decrease, respectively, with respect to base load of 50 kW. “x” has been taken as 400 units per 10 kW change in load over base load of 50 kW.</p> <p>Once the amount equivalent to minimum energy charges for 9 months (seasonal period) is deposited by the consumer in the form of consumption, thereafter the bill shall be raised on actual consumption only. During off season period, if the consumption of the consumer exceeds the base energy units worked out with energy consumption formula $(4800+nx)$, $1/3^{\text{rd}}$ extra monthly energy charges at seasonal tariff rate in addition to regular off season energy charges during that month shall be charged.</p>
--	--	--

NOTE:-

1. Rice Sheller consumers shall not be required to serve any advance notice before closing/starting of the unit.
2. The Rice Sheller consumers shall also not be required to give an undertaking not to run his sheller during off season.

n

The General Conditions of Tariff and Schedule of Tariff is here by amended to the extent as above.

The billing with the revised/amended methodology shall be implemented by PSPCL from the date of issue of the order i.e. 23-10-2012. PSPCL shall make necessary changes in the existing software to make it compatible with the now approved billing system. However, till such time the modified software becomes executable, energy bills in respect of Rice Shellers shall be manually prepared by the PSPCL.
