Q.1 (A) Write the précis of the following passage of about one third of the original length and give suitable title.

A stamp is, to many people, just a slip of paper that takes a letter from one town or country to another. They are unable to understand why we stamp collectors find so much pleasure in collecting them and how we find the time in which to indulge in our hobby. To them it seems a waste of time, a waste of effort and a waste of money. But they do not realize that there are many who do buy stamps, many who find the efforts worth-while and many who, if they did not spend their time collecting stamps, would spend it less profitably. We all seek something to do in our leisure hours and what better occupation is there to keep us out of mischief than that of collecting stamps? An album, a packet of hinges, a new supply of stamps, and the time passes swiftly and pleasantly.

Stamp-collecting has no limits and a collection never has an end; countries are always printing and issuing new stamps to celebrate coronations, great events, anniversaries and deaths. And the fascination of collecting is trying to obtain these stamps before one's
rivals. Every sphere of stamp collecting has its fascination, receiving letters from distant countries and discovering old stamps in a leaves of dusty old books. A stamp itself has a fascination all its own. Gazing at its little picture we are transported to the wilds of Congo, the homes of the Arabs, and the endless tracks of the Sahara desert. There is a history in every stamp. The ancient Roman Empire and the Constitution of America, India's Independence and the Allied victory, are all conveyed to our mind's eye by means of stamps. We see famous men, pictures, writers, scientists, soldiers, politicians and famous incidents. Stamps, so small and minute, contain knowledge that is vast and important.

The Hindustan Aluminum Co. Ltd. whose share capital on 31st March, 2011 consisted of 12000, 8% redeemable preference shares of Rs.100/- each fully paid and 40,000 equity shares of Rs.100/- each. Rs. 80/- paid up, decided to redeem preference shares at a premium of Rs.10/- per share. The Company’s Balance Sheet as on 31st March, 2011, showed a General Reserve of Rs.18,00,000/- and a Capital Reserve of Rs.1,70,000/-. The redemption was affected partly out of profit and partly out of the proceeds of a new issue of 6000, 7.5% cumulative preference shares of Rs.100/ each at a premium of Rs.25/- per share. The premium payable on redemption was met out of the premium received on the new issue.

On 1st July, 2011, the Company at its general meeting resolved that all the capital reserves be applied in the following manner:-

i) the declaration of bonus at the rate of Rs.20/- per share on equity shares for the purpose of making the said equity shares fully paid; and

ii) the issue of bonus shares to the equity shareholders in the ratio of one share for every four shares held by them.

During the year total production was 1,20,000 units. The break-up of
prime cost per units was: Material Rs.2.20 and wages Rs.1.80. The
average selling price was Rs.6.75 per unit and the entire quantity
produced during the year was sold out.

With effect from January 1, 1988 the selling price was reduced to
Rs.6.40 per unit. It was envisaged that production could be enhanced
during 1998 by 33 1/3 percent without incurring any overtime or
extra shift work, or additional selling expenses.

You are required to prepare statements showing:

i) Actual cost and profit for the year 1997.
ii) Estimated cost and profit for 1998 assuming that the entire
    production will be sold during the year.

Predetermined normal hours of working
To make ready       200 hours
Running on jobs     800 hours
Total               1,000 hours
From the data furnished below, compute the cost of job No. 8237:

Material consumed: 10 units at Rs. 5 per unit
Machine labour
To make ready: 2 hours at Rs. 1 per hour
Running on jobs: 8 hours at Rs. 1 per hour

Note: Whenever a job is to be put on the machine, the machine is cleaned, any tool or jigs already on the machine are removed and new tools, etc., suitable for the particular job are fixed before commissioning the machine for the job and the time involved is to be charged to the job as "make ready" time. Hence fixed expenses are absorbed on the basis of total normal working hours and variable expenses are absorbed on the basis of running working hours.
